Young Jen Kim
UX/ UI/ Product Designer

Experience

Malabs - San Jose, CA
Lead Designer
Oct 2015 - Current

- Successfully redesign and updating a company's corporate website (http://www.malabs.com) and improved the layout of the product pages to make the checkout process more effective
- Launched an online application process on the website for new customers, working collaboratively with the developers and marketing team to streamline account setup
- Design vendor web pages for Microsoft, AMD, Samsung, LG, Micron, Seagate, etc.
- Design and manage company graphic materials such as company catalogs, marketing brochures and tradeshow(TechFair) banners

Super Talent Technology - San Jose, CA
Sr. Web/Graphic Designer
Nov 2007 - Oct 2015

- Designed company website layout, including banners, graphic elements, and product images
- Established company brand image through catalog design, ads, and tradeshow materials
- Managed web content updates based on project manager requests and updated engineer datasheets using CMS (content management system)
- Collaborated with engineering teams to design and develop USB products

Union Land Inc - San Francisco, CA
Sr. Product Designer
Apr 2006 - Oct 2007

- Conducted market research on current trends for company products by actively participating in trade shows within the playground industry
- Enhanced product branding with design and upgrade of product colors, logos, and marketing materials, leading to new introduction of Korean company into US market

ID-ONE Design - Austin, TX
Industrial Designer
Oct 2005 - Mar 2006

- Collaborated with Apple engineers, made design proposals for Apple iPod docks
- Personalized and presented multiple design options based on individual customer needs

Hyundai Heavy Industries - Seoul, South Korea
Industrial Designer
Aug 2001 - Apr 2004

- Conducted user research and interviews to design Hyundai products, collaborating with the product design team to develop innovative designs
- Became team leader in all aspects of graphics development, including creation of new logos and choosing product colors
- Collaborated with engineers, PMs, and customers to meet needs and safety requirements
- Gained valuable experience in ergonomics, manufacturing process, and other engineering insights by interviewing Hyundai factory workers
